[Github](#) | [Linkedin](#) | [portfolio](#)

Skills:

Expertise: HTML5, CSS3, Bootstrap 5, Daisy UI, Firebase, MongoDB, JavaScript, React

Comfortable: Express.js, Prisma, PostgreSQL, Next.js, Antd, Tailwind, Redux, TypeScript

Familiar: Socket.io, React-native,

Tools & Technologies: VS Code, Git, GitHub, Netlify, Vercel, Chrome DevTools, Postman, Supabase

Soft skills: Hard Working, Active Listening, Teamwork, Responsibility, Adaptability

Practical Project Experience:

Computer repair and IT solution - Service booking system

[Livesite](#) | [Client](#) | [Server](#)

Overview: Efficiently book services, and make payments securely via SSL commearz. A multi-role user system ensures privacy, with a user-friendly dashboard displaying payment and booking history.

Features:

- Users can add services to carts, booking services, and payment with SSL commearz.
- Multi-role user routing system with private route and an attractive dashboard.
- Users can see payment and booking history on the dashboard.

Technology Used: Tailwind, Antd, TypeScript, Next.js, Express.js, PostgreSQL, Prisma, Redux, SSL commearz

WhatsApp - Chat application like WhatsApp

[Livesite](#) | [Client](#) | [Server](#)

Overview: Engage in live conversations via a user-friendly interface. Send text, images, and emojis for effective communication. Keep track of recent chats for easy access.

Features:

- Enable one-on-one conversations and display users in the chat list for streamlined communication.
- Effortless Communication: Seamlessly Share Text, Emojis, Images, and More for Enhanced Conversations
- Discover all friends, including chat list contacts. Review recent and unread messages for communication

Technology Used: Tailwind CSS, Antd, TypeScript, Next js, Redux, Express.js, Postgresql, Prisma, Firebase

Vehicle Hub - Vehicle management system (Team project)

[Livesite](#) | [Client](#) | [Server](#)

Overview: Seamlessly compare key metrics such as fuel efficiency, maintenance costs, and performance to optimize fleet management. Gain insights for informed decision-making and resource allocation.

Features:

- Track, schedule maintenance, manage expenses, and generate reports for optimal operations
- Securely control system usage for drivers, managers, and super-admins for streamlined workflow.
- Ensure Prisma model integrity, optimize data relations, and uphold database efficiency

Technology Used: Tailwind CSS, Antd, Typescript, Next js, Redux, Express Js, Prisma, Postgresql

Education:

B.Sc in Chemistry, National University

(2018 - present)

Courses:

- **Complete Web Development Course with Jhankar Mahabub** (Programming Hero - 2022) || [certificate](#)
- **Next Level Web development** (Programming Hero - 2023)

Language: • English(Comfortable) • Bangla(Native)
